

CST CERNER STUDENT TRAINING UPDATE

Winter 2024

With the Clinical & Systems Transformation (CST) project continuing to roll out to new sites this year, we are happy to share the latest updates on CST Cerner student training. Through this collaboration, we want to ensure students are supported and successful in their documentation within the electronic health record system.

KEY INFORMATION FOR STUDENTS AT FUTURE CST CERNER LIVE SITES

VCH:

- **Vancouver General Hospital (VGH)** will bring remaining ambulatory clinics onto the system in cycles, with Cycle 2 Clinics scheduled for **February 5, 2024**. See full list of Cycle 2 clinics [here](#) (accessible with a health authority network account)
- **Richmond Community of Care** is on track to roll out CST Cerner in **late spring 2024**.

PHSA:

- **BC Cancer – Abbotsford** will be the third BC Cancer centre to roll out CST Cerner and is set to go-live on **January 22, 2024**.
- **BC Children's & Women's hospitals and campus (C&W)** is moving forward with ambulatory clinic cycles, with [Cycle 2 Clinics](#) scheduled for **February 12, 2024**. See full list of clinics [here](#) (accessible with a health authority network account)
- **BC Cancer – Surrey** is preparing for rollout in **spring 2024**.

Students and clinical instructors will be enrolled into the online curriculum by the CST Learning team. To support this, **student names must be confirmed in HSPnet four weeks prior to the start of placement**. Students at future CST Cerner live sites can contact Learn@cstproject.ca with their questions.

Review the [CST Student page](#) on the CST website for detailed information on how to complete training.

CONTACT INFORMATION FOR SITES ALREADY LIVE WITH CST CERNER

The training process is different for sites that are already using CST Cerner and sites that have not yet implemented CST Cerner.

The IMITS' Acute & Ambulatory Information Services team oversees education for sites already live with CST Cerner. This includes Lion's Gate Hospital, St. Paul's Hospital, BC Cancer – Vancouver and more. Students who are placed at any of the [live sites listed here](#) should contact CSTCernerTraining@phsa.ca with their questions.

KEY REMINDERS:

[LearningHub](#) is the online learning management platform used to register users into their training. **Students are required to use their academic email in LearningHub.**

Students need to use the **Network Accounts (ADID)** associated with the health authority of the **first CST Cerner site** where they were placed. For example, if students first accessed CST Cerner while placed at PHC and are now starting their placement at VCH, they are to use their PHC network account as the CST Cerner login.

You can visit the [CST student page on the CSTproject.ca website](#) for more information about sites currently using CST Cerner, training processes, student checklists and more.
